Fellowship trained \* Board certified

Our providers and staff strive to provide the highest quality comprehensive dermatologic health care services. The ability to provide patient access to such high quality skin care providers and services is an essential component to any quality-based medical practice. Our ownership interest in ADG Pathology (ADG) reflects our commitment to providing the highest standard of patient care for the dermatopathology services provided today and in the future. This will enhance our ability to direct the manner in which your care is delivered.

Every effort will be made by ADG to process the charges associated with these services under your insurance plan, even if our office does not accept your insurance. As with any laboratory located outside our office, you will be responsible for any payment not fully covered by your insurance. Further, our practice may receive a benefit from the referral.

If you have any concerns regarding your biopsy being sent to ADG, please do not hesitate to contact our office to request additional information or to ask for an alternative referral prior to the sample being obtained through biopsy or surgery. Please be aware of your right to request a referral to an alternative facility.

#### PATIENT ACKNOWLEDGEMENT

I hereby acknowledge receipt of a copy of the foregoing Physician's Disclosure of Financial Interest.
